**About Stock Holding Corporation**

Endurance Technologies is one of India's leading automotive component manufacturing companies. Anurang Engineering Company Private Limited which merged into our company in 2006, commenced manufacturing of aluminum castings in Aurangabad, Maharashtra, India in FY 1986. Over time, the company has grown organically in India and diversified its capabilities by introducing suspension products, transmission products and brake systems. Starting with two aluminum casting machines in FY 1986, it has grown to operate 18 plants in India and 8 plants in Europe. Today Endurance Technologies is the largest aluminum die casting manufacturer\* in India and one of the leading automotive component manufacturers in aluminum die casting (including alloy wheels), suspension, transmission and brake systems.

The Endurance Technologies is a complete solution provider from design to after-market service

After the successful last few years for the hiring of Management Trainee's pool, Endurance Technologies again sourcing candidates with management potential for- Management Trainee Pool program 2017.
