Dr. Jitendrasinh Jamadar

(Mob. No. : 9890078301)

Training and Placement Officer

Unprecedented advancement in science and technology has encompassed the world and revolutionized our lives. At the same time it has broadened the scope and redefined trends in management practices and processes.

It is necessary to train the students in a manner to meet the demands of modern industrial environment. We place special emphasis to create an ecosystem which is highly conducive for building solid foundations of knowledge, communication skills, soft skills, personality development, self discipline and enhancement of creativity through motivation and drive. This helps to produce young professionals, well trained for facing rigors of professional and social life.

This task is accomplished by Training and Placement Cell which acts as a catalyst and a bridge between the industry and the Institute. We organize Industrial Training, Industrial Projects, Industrial Visits, seminars and other activities for giving an edge to our students.

We express our gratitude to the organizations which have given opportunity to our students and have also visited our campus to train them. We shall strive continuously to enhance the suitability of our students for management /junior leadership positions. Our endeavor at the training and placement cell is to assess the suitability of the students to various job profiles and train them to get seamlessly integrated in their new organizations.

We solicit your suggestions, recommendations and feedback to that an extant.
